<p><b>TIME STARTED</b></p> <p><b>HHCONSENT.</b> Before we get started, there are a couple of important things I want you to know about this study. This is an on-going study of families and neighborhoods in Los Angeles County. The goal of the study is to understand how families and neighborhoods affect people's health and well-being. I would like to ask you some questions about your family's finances. The questions will take about 30 minutes and should be easy to answer. Your participation in this study is completely voluntary, but very important. You can choose not to participate, you can choose to answer some but not all questions, and you can stop the interview at any time. The answers that you give us will be used for research purposes only. We will keep all information confidential and completely separate from any information that might identify anyone in this household personally. Are you willing to participate?</p>	<p><b>{HABTIM: TIME STARTED}</b></p> <p><b>HACONSENT</b> "Before we get started, there are a couple of important things I want you to know about this study.
